<p>(Indoor)</p> 	<p>(In Car)</p> 
	 <p>① Benefit the front passenger seat ② Central armrest in the rear seat ③ Platform behind the rear seat</p>
<p>1.Connect the purifier with the household power cord with following the illustration guidance. 2.Plug in the wall power socket. 3.Switch to the required mode to start the purifying.</p>	<p>1.Connect the car charger cord with air purifier. 2.Plug into the 12V power socket setup on car. 3.Switch to the required mode to start the purifying. 4.Please always keep air conditioner of car itself in the low air speed mode status.</p>
<p><b>NOTICE:</b></p> <p>(In door)</p> <ul style="list-style-type: none"><li>Assuring the device can work normally, to install the purifier at well-ventilated position.</li></ul> <p>(In Car)</p> <ul style="list-style-type: none"><li>Switch the air purifier on before you start to drive the car.</li><li>Please always unplug the car charger when you stop the car operation, for the safety of car battery.</li><li>Remember to switch the machine off to the mode (O) after using the air purifier. If not, the fan will be delayed a few seconds to get powered when you turn on the air purifier next time. This is regular condition.</li></ul>	

- O: Turn-off the power.  
A: Automatic mode. The device will run and detect the surrounding air quality automatically at low speed for 3 minutes as the default setting, and it will adjust itself to suggested speed.  
I: Purifying at low speed  
II: Purifying at high speed

LED indicator:  
It will reflect indoor air quality by 3 light signals,  
Green light: Power on  
Red light flashing slowly: Filter replacement reminder  
Red light flashing quickly: Filter cartridge is not placed in the correct position

 **Be sure the plastic packing is removed before installing the filter.**  
Attention !

## **FILTER CLEANING/REPLACEMENT**

### **【HOW TO CLEAN AIR PURIFIER and FILTER】**

- Power switch the air purifier to mode (O) (turn off the power) and disconnect the plug (AC Adaptor or Car Charger), please always clean up the air purifier with soft cloth. The air purifier may be damaged if using a damp cloth.
- Please clean filters with a small, soft brush carefully to prevent dust from falling off. To maintain the best performance of the purifier, it is suggested to vacuum the filters frequently especially in poor air quality environment.

(disconnect the plug)

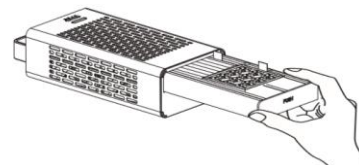

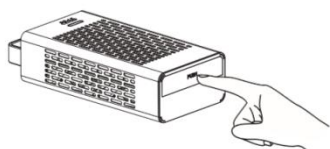

(brush dusts from the filters)

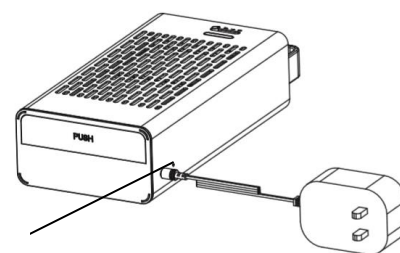

### **【HOW TO REPLACE FILTER】**

**Over 2,000 hours (about 8.3 months if you're using it for 8 hours per day) using the purifier, the filter replacement indicator will be on to remind the filter change.**

1. Turn off the power and disconnect the plug.
2. Press the "PUSH" at the bottom to let filter cartridge jump out. Then, pull out the filter cartridge.

3. Remove old HEPA filter and deodorizing cartridge.
4. Insert new HEPA filter and deodorizing cartridge into the air purifier.
5. Push the cartridge back for use.
6. Use an object with a sharp end to stab on the resetting button for 3 seconds. It will reset the timer of the filters.

(filter lifecycle resetting)

## **TROUBLESHOOTING**

Contact our customer service if you have the need to purchase new filters.

Symptoms	Measures to take
Why the air purifier cannot be on or shut down itself?	<ul style="list-style-type: none"><li>● Check if the power plug is connected to the electric outlet properly.</li><li>● Check if the filter cartridge is placed in the correct location.</li></ul>
The red indicator still flashes though the filters has been replaced and pressed the resetting button.	Please contact the customer service.
How often should I clean the filters?	It is suggested to clean filter normally after 2 months using the purifier (8 hours per day). If the air quality is poor in the area, please clean the filter constantly and follow the correct filter cleaning methods.
How often should I change the filters?	<p>Change the filters when filter replacement reminder is flashing. If the purifier is often used in dusty environment, especially in winter while the air is hazy and smoggy, it's recommended to change filters every 4 months (if you're always using it about 8 hours per day). Please follow the filter changing methods as instructed.</p> <p>After changing the filters, stab on the "resetting button" at least 3 seconds to reset the timer.</p>

## **SAFETY INFORMATION**

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons. Please read the instructions carefully before using.

	Do not use outdoors.		While using any electric appliance, the users should reduce the risk of fire or electric shock.
